The Aqua-Hot Gen 1 is a compact Forced Air Heating and Water Heater system in an all-in-one unit, fueled by Diesel, Gasoline or Propane specifically designed for RV vehicles

 **Aqua-Hot**®
An AIRXCEL Brand

 **AIRXCEL**™

Aqua Hot, has over 35 years of expertise in RV luxury comfort systems, Now bringing the combined comfort with the Aqua Hot Gen 1 furnace and water heater.

This single appliance saves space and weight in your vehicle, while providing a comfortable environment as well as 2.64 G of hot water. The Aqua Hot Gen 1 can heat the water independently of the furnace, allowing you to be comfortable all year round and always be ready to have a hot shower. Warm air flows to the vehicle’s interior spaces through four air outlets, where it is distributed efficiently to ensure a comfortable climate. Utilizing RV-C **Open Source** intelligence, you can easily integrate the total control of the unit into the RV’s general control panel.
